The architecture firm from the BKW Engineering – Network of Excellence® impressed the jury in the category of architecture and civil engineering.

Berlin, 17 December 2024

ingenhoven associates was honoured at the 17th German Sustainability Award in Düsseldorf. As in previous years, the award focused on Transformation in Germany and recognised pioneers in the field.

With six competitions and around 3,000 guests, the German Sustainability Award is Europe's largest and most prestigious prize for ecological and social engagement. A panel of 224 jurors selected companies they currently see as leading pioneers of transformation within their respective industries. ingenhoven associates "emerged victorious in the final round because the company has made particularly effective and exemplary contributions to transformation," said the jurors of the German Sustainability Award when explaining their decision. "The company has served as a role model and sent out the right signals in its industry and beyond," they added. The committee praised ingenhoven associates' holistic supergreen® approach and its commitment to continuously pushing the boundaries of sustainable architecture, which were recognised as an important and exemplary contribution to driving progress within the construction industry and beyond.

BKW Engineering

The BKW Engineering – Network of Excellence® is the largest association of independent engineering, architectural, appraisal and testing companies in Germany, Austria and Switzerland. With 3,800 employees across more than 50 companies in some 130 locations, the company offers highly specialised expertise from a single source. With its infrastructures and buildings, the innovative and trailblazing network paves the way for a sustainable future for society and the environment and creates living spaces worth living in.

BKW

The BKW Group is a Bern-based international energy and infrastructure company, employing over 12,000 people. Its company network and innovative technologies enable it to offer customers a full range of skills in the areas of infrastructure, buildings and energy. The Group plans, builds and operates infrastructure to produce and supply energy to businesses, households and the public sector, and offers digital business models for renewable energies. Today, the BKW Group portfolio includes everything from engineering consultancy and planning for energy, infrastructure and environmental projects to integrated services in the field of building technology as well as the construction, servicing and maintenance of energy, telecommunications, transport and water utility networks. With trailblazing solutions, companies under the BKW Group umbrella create spaces for life.
